Northwind Payments

Re: Application for Senior Software Engineer

Dear Hiring Team,

I am writing about the Senior Software Engineer role on the payments platform team. Owning a service end to end, including the on-call that follows it, is how I have worked for the last four years.

Your posting emphasises service-oriented architecture and reliability. On my current team I replaced a monolith path handling four million requests a day, which cut p95 latency from 840ms to 210ms, and rebuilt the deployment pipeline so we ship twelve times a day with automatic rollback rather than once a week.

The reason I am applying to Northwind rather than anywhere else is the public commitment to settlement transparency. Payments systems are unusually unforgiving, and I would rather work somewhere that treats that as the point.

Thank you for your time, and I would be glad to discuss the role.

Best regards,

Daniel Okonkwo
