Cape Provisions Group

Sub: Application for the position of Regional Distribution Manager

Dear Hiring Team,

I am applying for the Regional Distribution Manager role. I currently run a 14,000 square metre distribution centre with 48 staff across three shifts, dispatching 1,100 orders a day.

Your posting sets a 99% OTIF target. I took my current site from 94.2% to 98.6% in eleven months by resequencing pick waves and adding a pre-dispatch check, and held stock variance at 0.4% with weekly cycle counts. On cost, renegotiated service contracts and backhaul planning reduced fleet running cost 12%.

The reason I am interested in this role is the three-site scope. Getting one site right is a matter of presence; getting three right means building the routines that work when you are not standing there, which is the step I want to take next.

I would welcome the opportunity to discuss it.

Yours sincerely,

Sipho Ndlovu
